

Revolutionizing On-Site Data Destruction for Third-Party IT Support Companies

In today's data-driven world, businesses are awash in sensitive information; from customer records & employee data to financial transactions and intellectual property.

This abundance of data, however, also presents significant challenges in ensuring its security and compliance with stringent data privacy regulations.

Data breaches have become alarmingly commonplace, causing irreparable damage to businesses' reputations, financial stability, and legal standing.

Trusted, Assured, Certified & Tested

Trusted by the
NHS and used by
multiple NHS Trusts

Independently
Product Assured,
to meet NIST 800-88
standards

Certified to
meet NIST 800-88
standards

Penetration Tested
to ensure Data
Destruction

The Need for Rapid and Secure On-Site Data Destruction

Third-party IT support companies play a crucial role in helping businesses navigate these data security challenges.

As businesses cycle through devices and discard old equipment, ensuring that sensitive data is securely destroyed is paramount.

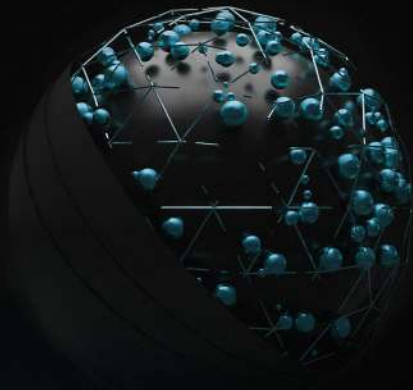

Traditional data destruction methods, such as shredding or incineration, often involve time-consuming processes that require the transfer of sensitive data to third-party facilities, increasing the risk of exposure.

Enter the DSS Mobile

A Breakthrough in On-Site Data Destruction

Introducing the DSS Mobile, a revolutionary self-contained data destruction unit that redefines the way sensitive data is destroyed on-site.

Unlike traditional methods that can take hours or even days, the DSS Mobile destroys data on the vast majority of modern devices in a matter of seconds, rendering it irretrievable while keeping the item intact.

Unparalleled Benefits for Businesses

The DSS Mobile offers a multitude of benefits for businesses seeking secure and efficient data destruction solutions:

1 Unparalleled Speed

The DSS Mobile's ability to destroy data on most devices in mere seconds drastically reduces the time required for on-site data destruction. This minimizes disruption to business operations and ensures seamless data management.

2 Enhanced Security

On-site data destruction with the DSS Mobile eliminates the risk of unauthorised access or data exposure during transportation, at the destruction facility, or in transit back to the premises. Sensitive information remains under the control of businesses, enhancing their overall data security posture.

3 Compliance with Data Privacy Regulations

The DSS Mobile adheres to the highest industry standards for secure data destruction, including NIST 800-88 guidelines, ensuring that businesses meet stringent data privacy regulations such as GDPR and HIPAA. This helps mitigate the risk of legal and financial repercussions due to data breaches.

4 Secure Data Destruction

The DSS Mobile utilizes NIST 800-88 Product Assured data destruction methods, employing multiple data overwrite cycles and advanced algorithms to render data irretrievable. This comprehensive approach ensures complete data erasure without harming equipment.

Unparalleled Benefits for Businesses Cont.

The DSS Mobile offers a multitude of benefits for businesses seeking secure and efficient data destruction solutions:

5 Environmentally Friendly

The DSS Mobile's destruction process is designed with environmental sustainability in mind, minimising the impact on the environment and contributing to a greener future. It eliminates the need for traditional methods that generate significant waste and harmful emissions.

6 Quality Control QR Codes

Each data destruction process generates a unique QR code that serves as verifiable proof of destruction. This QR code provides traceability and accountability, enabling businesses to maintain transparency and comply with auditing requirements.

7 Robust Certification and Verifiable Destruction Evidence

The DSS Mobile's adherence to stringent data security and destruction standards is validated by certifications from leading industry organisations. Additionally, each data destruction process generates a unique QR code that links to detailed certificates of data destruction. These certificates provide comprehensive proof of destruction, ensuring transparency and accountability. Furthermore, the secure online portal offers comprehensive access to destruction records, allowing for seamless verification and traceability.

8 NIST 800-88 Certification and ADISA Certified

The DSS Mobile has been rigorously tested and certified to the highest industry standards for secure data destruction. It has achieved Product Assurance Certification to NIST 800-88 standards by ADISA. This prestigious certification demonstrates the DSS Mobile's commitment to data security and its ability to meet rigorous industry standards. NIST 800-88 is a widely accepted standard for secure data destruction, ensuring that sensitive data is irreversibly destroyed. ADISA, a respected organisation in the IT security industry, has named DSS Mobile ADISA Certified for its commitment to data security and its ability to meet its stringent standards.

Partner with DSS Mobile to Secure your Clients' Data

By incorporating the DSS Mobile into your service offerings, you can elevate your company to a trusted partner in data security and compliance. The DSS Mobile's unique capabilities and certifications provide a compelling value proposition for businesses seeking rapid, secure, and environmentally responsible data destruction solutions.

Contact Us Today

Partner with DSS Mobile to secure your clients' data, transform your data destruction services into a profit centre, and differentiate yourself from competitors.
