

**DATA SAFE  
SOLUTIONS**

# DATA SAFE SOLUTIONS

## On-Site Data Vaporisation Service

*The UK's Only On-Site Data Destruction  
Solution*

Trusted by the NHS and  
used by Multiple NHS  
Trusts

Independently Product  
Assured, to meet NIST 800-  
88 Standards

Certified to meet NIST 800-  
88 standards

Penetration Tested to  
ensure Data Destruction

# Why Choose On-Site Data Vaporisation?

## Your data is your responsibility—why let it leave your premises?

Unlike off-site third-party providers, our Data Vaporisation Technicians come to you, ensuring absolute security, compliance, and control over your sensitive information.

**With NIST 800-88 and ADISA-certified erasure, we guarantee total data destruction before any equipment leaves your facility.**

## No Risk No Data Leaving Your Site

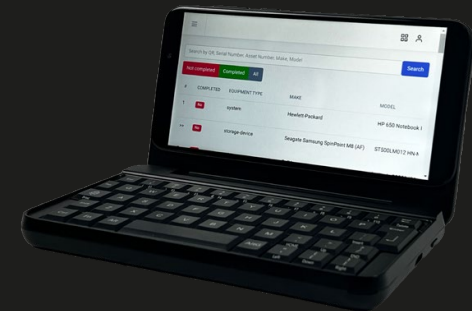

## Certified to the Highest Standards

## Instant Verifiable Proof of Data Destruction

## Profitable Turn Your Old IT Equipment into Income

## Ultra-Fast Processing – Hundreds of Devices Per Day

### **Minimal Space** Required – We Work Within a Small, Designated Area

## **Revolutionary Technology: Why On-Site Data Destruction is Now Fast & Easy**

Many organizations have never even considered on-site data destruction because they assume it takes too long or requires too much space. Traditionally, data erasure has been a slow, manual process, taking hours or even days to wipe large volumes of devices. Not anymore.

**Introducing the Patented Smart Wipe Engine – a Game Changer in Data Erasure**

### **Instant Secure Erase (ISE)**

Simply plug in and use with no integration requirements.

### **Parallel Processing**

Hundreds of devices can be erased simultaneously.

### **Automated & Verified**

Real-time erasure reporting for full compliance.

### **Integrated with DSS Mobile**

Eliminating transport delays & security risks.

### **No Waiting Around**

We start processing as soon as we arrive.

### **No Downtime**

Keep your business running while we securely erase your IT assets.

# How Our On-Site Data Vaporisation Service Works

## 1. Booking & Scheduling

Clients can book via email, online, or phone.

Appointments are scheduled at least one week in advance.

Our technicians arrive at 9 AM (or earlier if possible) to begin the process.

## 2. Secure On-Site Data Erasure

Devices complete NIST 800-88 data vaporisation.

Technical faults/damage is recorded'

Instantaneous proof of data destruction provided.

High-Speed Processing – Securely erasing hundreds of devices per day.

Minimal Space Requirement without interfering with daily operations.

## 3. Equipment Grading, Certification & Valuation

Every item is graded based on its condition and resale potential. Before any equipment is removed from the client's ownership, we provide a comprehensive asset report and certification of secure data destruction. This ensures full accountability, compliance, and traceability.

A detailed final report is provided, including serial numbers, asset valuations, and certified proof of data erasure, ensuring clients meet compliance.

## 4. Instant Payment & Equipment Removal

Clients can choose to sell their assets at a pre-agreed price or donate them to good causes.

The service cost is deducted from the valuation, meaning clients nearly always make a net profit.

Equipment is securely uploaded and removed only after data has been completely erased.

## Certifications & Industry Approvals

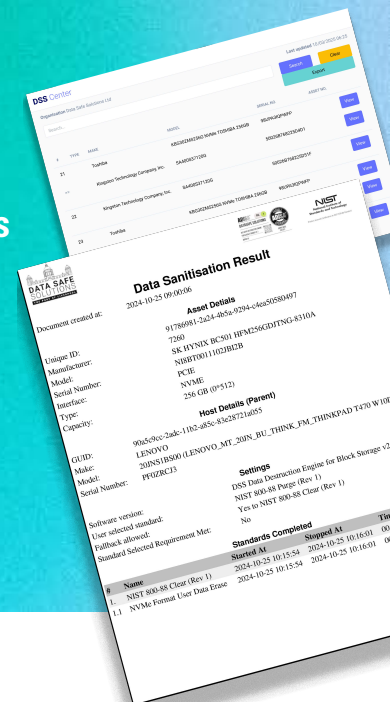

Our service is backed by the highest levels of certification and approval

- ❖ ADISA Product Assurance Certified (Highest Level)
- ❖ NIST 800-88 Compliant (Top-Security Data Erasure Standards)
